PERSONAL STRENGTHS

- 5 years of UX/UI design experience across B2B and B2C products, including healthcare, generative AI, and AI Agent platforms.
- Experienced in 0-to-1 product design, design systems, and end-to-end project delivery.
- Familiar with AI tools and workflows, including prompt design, Cursor, and Codex Agent.
- Strong understanding of user research, usability testing, and business-driven design, with good cross-functional collaboration skills.

BASIC INFORMATION

Date of Birth: 1998-04-28

Native Place: Yichang, Hubei

Education： South-Central Minzu University (Fine Arts)

Qualification： IELTS 6.5 (6)

WORK EXPERIENCE

SenseCare -UX Designer — 2024.8- Present

1. Lead cross-platform interaction and visual design for healthcare and AI products, including AI Agent platforms, clinician Copilots, and AI research tools. Translate user, business, and market insights into product improvements.

2. Build and evolve a cross-platform AI Chat component library to unify product experiences and accelerate AI integration. Apply an AI-native approach to optimize human–AI workflows.

3. Shape design strategies through requirement analysis, competitive research, and customer interviews. Collaborate with cross-functional teams to drive continuous improvement and delivery.

Key Project: Medical AI Agent Platform

Medical AI solutions were mainly delivered through customized projects, causing low reuse, high costs, and inefficient delivery. The platform standardized large models, knowledge, rules, and tools to support faster and scalable AI application development.

1. Completed the platform's 0-to-1 design under tight timelines and unclear requirements through competitive research, workflow analysis, and cross-functional collaboration.

2. Helped shift delivery from project-based to platform-based, reducing the time to build demonstrable solutions by approximately 30%–40%.

QingFlow -UX Designer — 2021.11-2023.11

1. Responsible for UX design across traffic and commercial product lines, supporting product launches and continuous iteration.

2. Led user research and analyzed feedback and data to identify pain points and improve product experience.Conducted usability testing and followed through on design implementation and validation.

3. Contributed to the development and maintenance of B2B design standards and component guidelines.

XinTian Hua Kai Technology -UI Designer — 2020.8-2021.7

1. Responsible for UI and visual design across B2B, B2C, and operational products.Translated product and interaction requirements into visual design solutions.

2. Followed up on development implementation and conducted usability testing to improve product usability.
